Objective

Software Developer with experience in React.js, .NET Core, SQL Server, and DevOps. Passionate about building scalable applications, leading development teams, and solving real-world problems through modern software engineering practices.

Education

YBN UNIVERSITY

Bachelor of Technology in Computer Science Engineering

Ranchi, Jharkhand

2023–Present

+2 HIGH SCHOOL PALAUNJIA

Intermediate, Percentage: 73.2%

Giridih, Jharkhand

2020–2022

DA(R)V RESIDENTIAL VIDYALAYA PALAUNJIA

Matriculation, Percentage: 66.4%

Giridih, Jharkhand

2019–2020

Skills

Languages: C, C++, Java, C#, Python

Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, Seaborn

Development Technologies: HTML5, CSS3, DBMS, LINQ, ReactJS, NextJS, Redux-Toolkit, Redux-Saga, Node.js, MS-SQL, .NET Core, React-Native, GSAP, ThreeJS, PostgreSQL

Soft Skills: Problem-solving, Time Management

Tools: VS Code, IntelliJ, Code::Block, Figma, Git, SSMS20, pgAdmin4, Jenkins, Docker, Visual Studio 2022, Swagger, Anaconda, Jupyter Notebook, Android Studio, Expo, VM Box, Overleaf, Clickup, Github, Collab, WireShark, AntigraVity

Experience

Eimple Labs

React Developer Intern

Remote

June 2024–June 2025

- Developed a real-time typing application using React.js and Material UI, integrating multiple user panels.
- Implemented Redux Toolkit and Redux Saga for state management and API integration.

Eimple Labs

.NET Developer Intern

Remote

July 2025–Feb 2026

- Developed REST APIs for **Jankoti**, a job-finding and recruitment platform, using .NET 8 and SQL Server.
- Implemented JWT authentication, role-based authorization, and recruitment-related APIs.

Eimple Labs

Team Lead – University ERP Project

Remote

Feb 2026–Present

- Led the University ERP development team, managing task planning, code reviews, and project delivery.
- Managed DevOps on Utho Cloud, including IIS deployments, Git workflows, CI/CD, and production releases.

Projects

A Comprehensive Review on Malware Detection Approaches: Conducting a comprehensive review of malware detection techniques, including signature-based, static, dynamic, and machine learning-based approaches. The research compares existing methodologies, detection capabilities, limitations, and challenges in identifying evolving malware threats.

Extra-Curricular Activities

Designed a GUI-based compiler during a college Hackathon.
